

## **Exclusive Networks appointed as Cisco IronPort and ScanSafe distributor for Scandinavia**

- Email and web security solutions are available to the Scandinavian channel immediately

Exclusive Networks announces today an agreement with Cisco to distribute its IronPort security solutions and ScanSafe SaaS web security services into the Scandinavia channel which includes Finland, Norway and Sweden.

Cisco IronPort email and web security appliances protect organisations of all sizes against spam, viruses, malware and other Internet threats – combining powerful performance with preventive and reactive security measures that are easy to deploy and manage.

ScanSafe was the first company in the world to offer Web security through a SaaS (cloud) model. Recognising that the changing face of the Internet would require more effective Web security than existing solutions could offer, ScanSafe sought to provide customers a solution that would require less maintenance, be more cost-efficient and could protect users from the new, more sophisticated threats that Web 2.0 would bring. ScanSafe became part of Cisco Security in December 2009.

“Cisco IronPort Email and Web security products are high-performance, easy-to-use and technically-innovative solutions and is the market leader in Scandinavia. We are excited to form this alliance with Exclusive Group, whose security expertise and strong market position in Scandinavia is recognised and welcomed.”, says **Thomas Ludvik Næss**, Regional Manager Cisco Security, North Europe.

“Exclusive Group is recognised as a leader in IT security distribution in several European countries and we are now able to extend this expertise into Northern Europe and look forward to working closely with Cisco Security Technology.”, explains **Mikko Vaajamo**, Director for Product Marketing and Alliances, Exclusive Group.

### **About Exclusive Group**

Exclusive Group is a European value added distributor specialising in critical security, infra-network and storage solutions. Exclusive Group is recognised for marketing highly innovative, forward-looking solutions that meet existing or emerging needs, such as unified information security threat management. The keys to Exclusive Group's success lie in its proven technical skills and its commitment to its operator, integrator, VAR and service provider partners (through consulting, training and support) and to its vendors and manufacturers, notably in defining their business plans and marketing actions. Headquartered in France, Exclusive Group is now present in 11 countries: France (Paris, Lyon and Montpellier), Spain, Portugal, Italy, Britain, Netherlands, Belgium, Francophone Africa, Switzerland, Sweden, Norway and Finland.

### **About Cisco Systems**

Cisco Systems, Inc. (NASDAQ: CSCO), is the worldwide leader in networking for the Internet. Information on Cisco can be found at <http://www.cisco.com>. For ongoing news, please go to <http://newsroom.cisco.com>.
